

\*\*\*\*\* GUIDE TO KDOT EQUIPMENT RATE TABLE\*\*\*\*\*  
(To be used on all City/County Federal –Aid Force Account projects)

Attached hereto is a copy of the Kansas Department of Transportation equipment rate table which is required to be used on your Federal-Aid force account projects. This rate table will be used for the project without regard to any future revisions or supplements to the rate table which may be issued. The following information may assist you in understanding and in using the table.

The rates given in the table are “use rates” compiled from records of the Kansas Department of Transportation and approved by the federal highway Administration. The rates depend on how extensively a piece of equipment is used in KDOT’s fleet, how often or how recently particular types of equipment have been upgraded in the KDOT fleet, and on KDOT’s methods of accounting for the expenses of particular types or pieces of equipment.

Therefore, some rates may not seem reasonable in relation to rates for other similar types of equipment; however, for the County or City whose records do not adequately support the development equipment cost records, these rates permit a relatively simple way to meet audit requirements and still recover reasonable equipment rates.

Use of these rates, which are periodically revised and further expanded and developed as more information is available, will allow the City or County to recover costs that otherwise would not be able to be claimed and will expedite the issuing of KDOT’s “audit assurance” which is required on force account projects.

Any equipment proposed to be used on Federal-Aid Force Account project which is not listed in this rate table, and for which reimbursement is desired, must have prior written approval of a rate by KDOT’s Bureau of Fiscal Services before being used on the project.
