Breakout of Construction Costs by Work Type

Dear Mr. Brown:

We were notified recently by the Federal Highway Administration that they require the construction contract costs to be broken out by work type for LPA administered federal-aid projects. In order to meet this requirement, we are requesting that the city compile the breakout following the letting and submit to this office in the following format:

Common Items - \$ Participating and \$ Non-Participating
Roadway - \$ Participating and \$ Non-Participating
Surfacing - \$ Participating and \$ Non-Participating
Bridges - \$ Participating and \$ Non-Participating
Traffic Signals - \$ Participating and \$ Non-Participating

Common Items would include items that are common to more than one work type. Field Office and Labs that are common must be listed separately. Roadway would include temporary project water pollution control, seeding, landscape, traffic control, fencing, signing, and lighting. The breakout must add up to the exact dollar amount of the contract award.

Letter to Doug Brown
