

AXIS 30 W Midspan

For indoor use, 240 V AC

- ✓ IEEE 802.3af and IEEE 802.3at
- ✓ 10/100/1000 Mbps
- ✓ 100 to 240 V AC
- ✓ Plug-and-play

AXIS 30 W Midspan is a 1-port midspan that can deliver up to 30 W to one network device. It is IEEE 802.3af (15 W) and IEEE 802.3at (30 W) compliant, which ensures compatibility with most Axis network products with built-in PoE.

Power over Ethernet (PoE) offers an easy, fast and cost-effective solution for powering network products. With a single network cable, a PoE midspan injects power to the network device with built-in PoE support and enables data communication between the device and the switch. No need to replace existing Ethernet switches and cabling infrastructure.
