

EPOXY APPLICATION KIT: CARTRIDGE

SWARCO Preformed Thermoplastic is a durable pavement marking system where thermoplastic lane lines, legends and symbols are supplied pre-cut and can be easily installed without specialized equipment. Preformed thermoplastic pavement marking material combines the convenience of pre-cut markings with the performance qualities of hot applied thermoplastic.

To ensure proper adhesion of the preformed thermoplastic marking on concrete surfaces or with large colored mats, the use of SWARCO 2-part Epoxy is suggested. This kit (SWARCO #4668) contains everything you need to safely and cleanly apply SWARCO Preformed Thermoplastic Epoxy on the job-site.

KIT INCLUDES

- One 6" metal roller frame
- Four 6" nap rollers
- One 3' wooden extension pole
- One pair black nitrile gloves

*SWARCO Epoxy sold separately.

EPOXY APPLICATION KIT: GALLON

SWARCO Preformed Thermoplastic is a durable pavement marking system where thermoplastic lane lines, legends and symbols are supplied pre-cut and can be easily installed without specialized equipment. Preformed thermoplastic pavement marking material combines the convenience of pre-cut markings with the performance qualities of hot applied thermoplastic.
