The better solution to silt fence, sand bags and straw wattles!

Triangular Silt Dike™ Edge Barrier

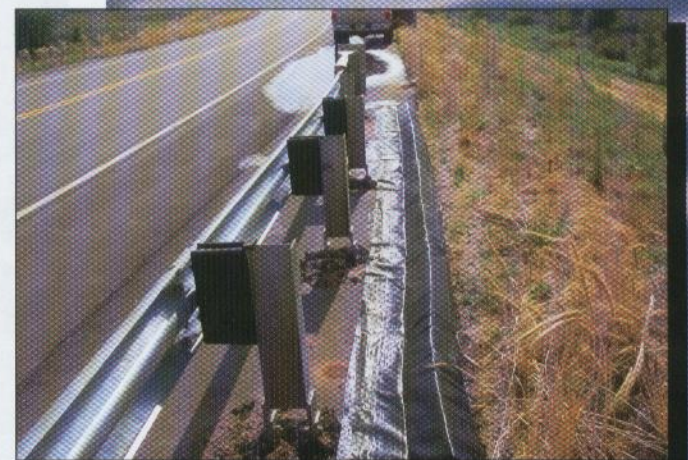

Designed as an easy installed, economical alternative to silt fence, straw wattles and sand bags the Triangular Silt Dike™ Edge Barrier is a positive solution to many development & construction site drainage & erosion problems.

Applications

- Along Curbs in Developments
- Diversion Dikes
- Inlet Protection
- Continuous Barrier
- Small Surface Drainage Areas
- Roadway Shoulder Protection

Advantages

- Effective
- Fast & Easy Installation
- Conforms to Curves and Rough Terrain
- Lightweight and Durable
- Re-useable
- Easy to Install on Concrete and Asphalt

Triangular Silt Dike™ Barrier Installation

Made with lightweight and durable materials, Triangular Silt Dike™ barrier weighs just 2-3 lbs. per seven foot section and installs in minutes with U-shaped wire staples or adhesive.

The flexibility of the barrier allows it to be installed on rough and rocky terrain while the protective apron on the barrier helps prevent erosion and failure of the structure.
