Utility Contacts

Re: 167<sup>th</sup> Street – Quivira Rd. to Switzer Rd. Reconstruction (BR-1664)

Dear Utility Representative:

Olsson Associates has been retained by the city of Overland Park to provide engineering design services for the subject project.

It is our intent to work with you during the design process to coordinate our designs with the potential relocation of your facilities.

In that regard, we ask that within the next two weeks you respond to us on the attached form and to supply us with maps, or other appropriate information indicating the location, size and type of your facilities. If you know of any additional utilities that we have not listed, please advise us of their existence. In addition, if your facilities are within existing easements it would be very helpful to have that information forwarded as well.

A location map is attached showing the limits of the proposed improvements. If you have any questions, please do not hesitate to call myself at 913-381-1170.

Sincerely,

Paul Moore, P.E.
