...per each for "Guard Fence End Terminal",...

SUBSECTION 1616

STEEL PLATE GUARDRAIL AND ACCESSORIES

Page 902, subsection 1616.02, add the following to this subsection:

(e) Guard Fence End Terminal.

When shown on the Plans, furnish guard fence end terminals. Guard fence end terminals are patented products manufactured by various companies. They are provided and accepted as a complete system, including accessories, posts and hardware. Provide all new materials that conform to the best standards and latest approved design of the manufacturer.

Page 902, subsection 1616.03. Add the following to this subsection:

(f) All guard fence end terminals must be prequalified as a unit. Manufacturers wishing to supply guard fence end terminals to Department projects must send a complete evaluation package including the FHWA letter of acceptance and all design and testing information to the KDOT Bureau of Design, State Road Office. The information will be reviewed and the manufacturer will be notified of the results. Those systems that are satisfactory for use will be placed on a prequalified list maintained by the Bureau of Materials and Research.

Page 904, subsection 1616.04. Add the following to this subsection:

(e) Guard fence end terminals will be accepted as a complete system on the basis of a prequalified brand name, a Type C certification, and visual inspection of the completed installation.
