QUIVIRA ROAD IMPROVEMENTS, 159TH STREET TO 179TH STREET (TH-1665) SURVEY CREWS

Dear Property Owner:

The City of Overland Park has hired Olsson Associates to provide final engineering design services for the improvement of Quivira Road between 159th Street and 179th Street.

In conjunction with this work, during the next several months, Olsson Associates will be conducting a land survey of the Quivira Corridor. Currently, this project is scheduled for construction in 2019. You will begin to see activity, occasionally from now until construction begins along the corridor, by Olsson Associates survey crews and their equipment; utility companies (locating, marking, and possibly relocating their facilities); and soil sampling crews and their equipment.

If you have any questions concerning the survey work or the proposed project, please call me at 913-895-6001 or Paul Moore with Olsson at 913-381-1170, from 8 a.m. to 5 p.m., Monday-Friday.

Sincerely,

TONY ROME, P.E.
SENIOR CIVIL ENGINEER
