143<sup>RD</sup> STREET IMPROVEMENTS, PFLUMM TO QUIVIRA (TH-0500)  
SURVEY CREWS

Dear Property Owner:

The cities of Overland Park and Olathe have hired HNTB Corporation to provide final engineering design services for the improvement of 143<sup>rd</sup> Street between Pflumm Road and Quivira Road, from its current two-lane configuration.

In conjunction with this work, during the next several months, Phelps Engineering will be conducting a land survey of the 143<sup>rd</sup> Street Corridor. Currently, this project is scheduled for construction in 2017. You will begin to see activity, occasionally from now until construction begins along the corridor, by Phelps Engineering survey crews and their equipment; utility companies (locating, marking, and possibly relocating their facilities); and soil sampling crews and their equipment.

If you have any questions concerning the survey work or the proposed project, please call me at 913-895-6001 or Phil Eilers with HNTB at 913-312-4861, from 8 a.m. to 5 p.m., Monday-Friday.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Tony Rome', with a stylized flourish extending to the right.

TONY ROME, P.E.  
SENIOR CIVIL ENGINEER
