

809 - CONCRETE SAFETY BARRIER

809.1 DESCRIPTION

This work shall consist of erecting and removing concrete safety barriers, in accordance with the requirements of Section 809 of the Standard Specifications except as otherwise modified herein, as indicated on the construction plans or as directed by the Engineer.

809.2 MEASUREMENT AND PAYMENT

The Engineer will measure the concrete safety barrier of various types designated on the plans by the linear foot. The barrier will be measured only once, even if it is relocated on the project.

Payment for "Concrete Safety Barrier" at the contract unit price bid is full compensation for the specified work, including moving of temporary barriers to alternate locations for various phases of construction when required, and for all labor, equipment, tools, and incidentals to complete this work.
