- [Product Features](#)

This bracket kit includes sign-to-bracket hardware. Bracket-to-surface hardware is not included. Necessary hardware items will vary based upon your installation requirements.

The enhanced #800 wing bracket provides horizontal support 24" inches along the blade and features a slot wide enough to accommodate extruded signs. Signs are secured with three 5/16" standard set screws at critical points along the sign - the bracket is drilled and tapped with three each 5/16" holes opposite 9/16" no-tapped holes. This bracket also features a wider contact area where the bracket mounts to the pole, and channels to accommodate up to three bands of steel strapping. The #800 may be mounted on a wall, concrete, wood or any post with 3/4" strapping, bolts or lag screws or spikes (not included).
