

NEW!

Pan-Steel® MS75 Metal Strapping System

Mechanical fastening applications demand high quality systems that can withstand harsh environments while maintaining a safe and secure physical infrastructure. Severe weather, intense UV rays, high vibration, and galvanic corrosion are all variables that can sacrifice performance and create safety hazards. Panduit offers innovative solutions that provide reliable fastening of critical components which allows businesses to minimize risk and enhance productivity.

The Pan-Steel® MS75 Metal Strapping System is now available in 201 and 316 stainless steel to deliver maximum performance, high strength, and enhanced job site safety, ideal for the Sign and Signal, Oil and Gas, and Industrial markets. Designed to work together in extreme conditions, the MS75 metal strapping, buckles, and installation tool reduce installation time by as much as 50%, when compared to competitive offerings. This system is part of the complete range of harsh environment solutions available from Panduit.

Buckle Bridge Teeth
Deliver additional body slip resistance for optimum strength

Hooked Clamping Tab
Provides full coverage of cut end of strap for enhanced safety

Buckle Screwdriver Slot
Allows use of screwdriver for buckle closure for a simple quick installation

Buckle Locking Tabs
Improved locking mechanism for higher strength

Key Features

Benefits

MS75 Strapping and Buckles	
Buckle locking tabs	Improved locking mechanism for higher strength
Buckle screwdriver slot	Allows use of screwdriver for buckle closure for a simple, quick installation
Hooked clamping tab	Provides full coverage of cut end of strap for enhanced safety
Buckle bridge teeth	Deliver additional body slip resistance for optimum strength
Fully assembled 201 stainless steel discrete lengths	Eliminates assembly, reducing installation time by as much as 50%, when compared to competitive designs
Weather resistant packaging for coils	Maintains package integrity when compared to the traditional cardboard carton for improved water resistance and durability
Smooth surfaces and rounded edges	Assures worker safety and bundle protection from abrasion during and after installation
Compatible with industry standard tools	No new installation tools are required
BT75SDT MS75 Strapping Installation Tool	
Screw drive tension mechanism	Provides high tension to secure bundle with minimal handle effort, for improved productivity
Robust design	Heavy duty construction offers a long term service life

Pan-Steel® MS75 Metal Strapping System

Simple 5-Step Installation Process Reduces Installation Time and Installed Costs

- 1) Place strap around the material, insert tail of strap through buckle. Pull strapping tight and bend up to hold in place.
- 2) Insert tail of strapping into tool nose section. Rotate handle to tension.
- 3) After tensioning, raise tool 90° – 120° over buckle and pull down on cutter lever, cutting strap.
- 4) Remove tool, press cut end down toward retaining tab.
- 5) Using a flathead screwdriver, bend retaining tab down and over cut end.

Provides finished, safe, and secure closure.
