The Davidson family of channelizer posts increase visibility and improve safety

Channelizer posts save lives by properly directing traffic and reducing the chance of accidents in many kinds of locations. Our posts are highly visible, day and night. They clearly delineate driving lanes with bright colors and reflective sheeting. To reduce the risk of accidents, place durable polyurethane channelizer posts at critical points along your roadways where safety hazards exist.

The DP 200 remains extremely flexible, even at extreme temperatures and returns to an upright position after impact.

The DP 200 has been NTPEP tested and meets MUTCD requirements for channelizing devices, and meets the requirements of NCHRP 350 for Category 1 Devices.

Features and Benefits

- 3" Round Channelizer Post
- Made of Highly Durable Thermoplastic Polyurethane for High Impact Resistance
- 360° of Reflective Visibility
- Stands Up to Extreme Temperatures
- No Metal Parts to Rust or Seize
- Ultraviolet Resistant
- 1-Piece Post Construction
- Simple Installation
- NTPEP Tested
- MUTCD Compliant
- Available up to 48" tall

Endless Applications

- Traffic Islands
- Dangerous Curves
- Work Zones
- Parking Lots
- Airports
- Gore Areas
- Highway Railroad Intersections
- Traffic Circles

Base Options:

- **Glue-down surface mount base**
50% recycled material - post held in place with 2 quick release pins

Spinner Base & Anchor Cup

Permanently mounted aluminum anchor cup. Drill and epoxy into existing pavement or pour set in new pavement. Once the anchor is set, the base and post can be easily installed or removed with a few quick spins.

Spinner Base

Anchor Cup
