3M is excited to announce The Work Zone as an authorized 3M Certified Sign Fabricator. To be part of the 3M Certified Fabricator Program, The Work Zone has undergone an extensive audit process 3M has set forth to ensure they have the proper equipment, manufacturing capabilities, as well as sales and technical support to properly fabricate and represent 3M products in the industry. The 3M on-site audit process was completed in March 2023.

As a 3M Certified Fabricator, The Work Zone is authorized to purchase 3M products and expected to execute proper fabrication when using 3M products to ensure they are meeting and exceeding expectations in the marketplace as initially intended by 3M in the design and manufacturing process.

3M is excited to continue building upon our business relationship with The Work Zone and look forward to continuing to make transportation safety a top priority together.

Regards,
