The PFI 200-1A coupler is a precision machined assemblage of components designed with a failure mode that meets all aspects of the 1998 American Association of State Highway and Transportation Officials (AASHTO) specification for sign, luminaire and traffic signal supports. The PFI 200-1A coupler is available as a direct replacement for the PFI 100-1 and other couplers that met the 1975 AASHTO specifications, thus assuring the motoring public the ultimate in safety.

Features:

- Tamper resistant.
- Easy to install.
- Maintenance practically non-existent.
- Direct replacement for supports of history.
- Meets all aspects of the 1998 AASHTO standard.
- Extensive laboratory tests verify superior performance.
- No anchor bolt damage after accidents.
- Precision manufacturing systems ensure repeatable characteristics.
