

iNPBF2S-X.X-X iNav Dual Mounts for 2.9" and 4.5" Poles

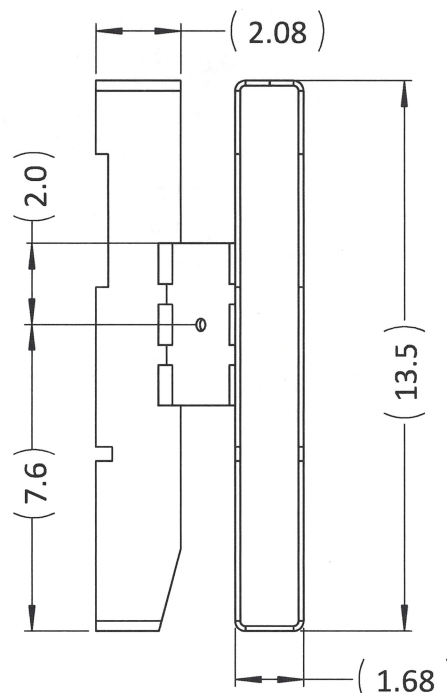

These mounts are designed to mount two iNavigator push button stations on either a 2.9" or 4.5" O.D. pole. The depth of the mount allows for two units with 9" x 12" or 9" x 15" signs to be mounted without interference.

The mounts attach to the traffic pole with a single 1" long bolt through the center plate. The push button stations attach to the pole with two hex bolts each. All mounting hardware is included.

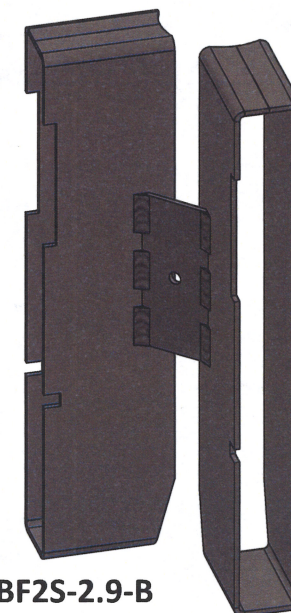

These dual mounts are constructed from aluminum, powdercoated black. Additional colors can be quoted upon request.
