

iN3 – iNavigator 3-Wire Push Button Station

iN35BN0-Y unit shown. Dimensions are in inches.

The iN3 Navigator 3-Wire Push Button Station (iN3 PBS) is the pedestrian interface to the iNavigator Accessible Pedestrian System. A system includes a Ped Head Control Unit (iPHCU3W) and a Push Button Station. The iN3 PBS provides valuable information and cues via both a vibrating arrow button and audible sounds making the intersection accessible for all pedestrians. All sounds emanate from both the front and the back of the unit. A sunlight-visible red LED latches “ON” along with a tactile feedback “bounce” to confirm the button has been pushed. The vandal resistant designed iN3 PBS includes the body which houses the ADA compliant push button (shown), a faceplate (sign), and mounting hardware.

By interfacing with the iPHCU3W that installs in the Ped Head, the iN3 PBS can provide the following standard features:

- Confirmation of button push via latching LED, sound, and tactile bounce.
- Direction of travel (with extended button push)
- Standard locating tone during Don't Walk (and Clearance if desired)
- Cuckoo, Chirp, Rapid Tick, Verbal, or user customized voice messages during walk. A total of 10 walk sound options are included with an additional 3 locations for custom voice messages / walk sounds
- Vibrating button during walk
- Choice of 4 locating tones, Canadian Melody, or verbal countdown during PED clearance
- Most sounds have a minimum and maximum volume independently set
- Extended button push can turn on and boost volumes on the activated crosswalk
- Custom audio messages, configuration settings, and firmware updates can be easily uploaded wirelessly via Bluetooth using Windows or iOS
- Independent ambient adjustment setting for the locate tone which allows fine adjustments for low ambient conditions
- 3 Wires (Data, PWR, GND) for iN3
