

# 90° Split Sweeps

For making bends in the ground or for risers out of the ground.

CRS's SPLIT SWEEPS are industry leading sweeps manufactured from CRS's SPLIT CONDUIT. They are great for 90 degree turns in the ground or for 90 degree risers coming up out of the ground. Just as with the SPLIT CONDUIT, when snapped together, the unique interlocking design of the SPLIT SWEEPS creates a smooth, tight seal protecting the cable of fiber optics from weathering.

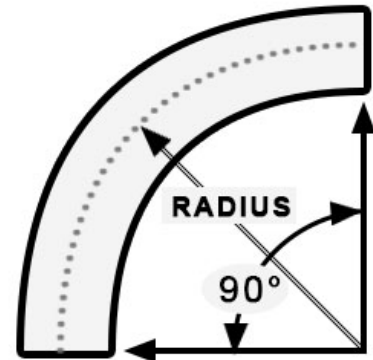

CRS's 90° SPLIT SWEEPS are ETL listed\* and meet the standards and specifications of UL 651.

No tape, plastic or metal straps are needed to seal or provide extra strength to the SPLIT SWEEPS.

Please note that it is necessary to use CRS SPLIT COUPLINGS and/or SPLIT ADAPTER COUPLINGS to connect the sweeps to our SPLIT CONDUIT or to standard PVC pipe.

\* The ETL listing does not apply to our Type C and 1 inch Sch. 40 products.

\*\* 2 Inch Sweeps are also available in a 20 inch radius and a 30 inch radius. Contact us for more information.

What is the difference between horizontal and vertical split sweeps?
